

The graph displays four distinct routes connecting a set of points. The points are clustered in the upper-left quadrant of the plot, with x-coordinates between 260 and 340 and y-coordinates between 30 and 70. The routes are defined by the following approximate coordinates (x, y):

- Route 1 (Blue):** (260, 65) → (275, 55) → (280, 45) → (290, 40) → (300, 40) → (305, 45) → (310, 50) → (315, 55) → (315, 60) → (310, 65) → (280, 65) → (260, 65).
- Route 2 (Orange):** (260, 65) → (280, 55) → (290, 50) → (295, 45) → (295, 40) → (290, 35) → (280, 35) → (260, 65).
- Route 3 (Green):** (260, 65) → (270, 55) → (275, 50) → (280, 45) → (290, 40) → (300, 40) → (305, 45) → (310, 50) → (315, 55) → (315, 60) → (310, 65) → (300, 65) → (290, 65) → (280, 65) → (260, 65).
- Route 4 (Red):** (260, 65) → (280, 65) → (290, 65) → (300, 65) → (310, 65) → (315, 60) → (315, 55) → (310, 50) → (305, 45) → (290, 40) → (280, 40) → (275, 45) → (270, 55) → (260, 65).
