

The graph displays four distinct routes plotted against a horizontal axis ranging from 200 to 550. The vertical axis is unlabeled. The routes are identified by color in the legend: route 1 (blue), route 2 (orange), route 3 (green), and route 4 (red). Each route consists of a series of connected points. Route 4 is the uppermost curve, peaking around x=330. Route 1 is the second curve from the top, peaking around x=310. Route 2 is the third curve from the top, peaking around x=290. Route 3 is the lowermost curve, peaking around x=310. The routes show varying patterns of peaks and troughs, with Route 4 generally having the highest values and Route 3 the lowest.
