

Figure 1 is a line graph illustrating the evolution of 10 routes (route 1 to route 10) over 120 iterations. The Y-axis represents a value ranging from 0 to 120, and the X-axis represents the iteration number from 0 to 120. All routes start at different values and converge to a common value of approximately 90 around iteration 60. After iteration 60, the routes diverge significantly, with route 1 (blue) dropping to approximately 20, route 2 (orange) dropping to 0 at iteration 40, and routes 3 through 10 rising to values between 70 and 110.
